

100W Sign Projector

Manual 2025

Package Contents

Projector, optical lens and power cord with standard 110 volt plug.

Description

Sign projectors are rated IP65 for outdoor use. To project an image, a high resolution glass or metal lens is required. To order custom lens, e-mail the artwork of the desired image to sales@compliancesigns.com. Line-art or vector files are acceptable, as are pixel files (e.g. JPEG, .PNG, .TIFF, .PDF, etc.) 300 dpi or better.

Safety Information

- For indoor or outdoor use.
- Prevent direct eye exposure to the light source as it may lead to injury or blindness.
- The projector may generate heat. Please use caution when handling or touching the unit during and after operation.
- Only use power sources that comply with local electrical and building codes and have proper grounding.

Lens Specifications

- Outer diameter (OD) - 37.5 mm
- Inner or image diameter (ID) - 25 mm
- Lens thickness: Up to 3 mm

Adjusting the Image Focus

Once the lens is successfully installed, rotate the lens clockwise or counter-clockwise until the image is in focus. Once the image is in focus, turn the lock ring clockwise until the rubber gasket is slightly compressed.

Turning Rotating Effect ON/OFF

Press the button located on the back of the projector to turn the rotator ON or OFF.

ON

Lens Installation & Exchange

Step 1

Unlock the lens lock ring by unscrewing it counter clockwise. Then turn the optical lens counter clockwise until it comes off.

Step 2

Remove the metal pressure clip by squeezing together the two bent ends.

WARNING: Please use caution when removing or installing the pressure clip, as it may spring or jump out unexpectedly.

Step 3

Place the lens with image facing down (reversed) in the lens slot.

Step 4

Place the metal pressure clip on top of the lens and make sure it is pressing against the lens evenly.

PROJECTORS MUST BE SECURED WITH A SAFETY CABLE
