- **With the Master PDF open, navigate to the template page you need.**
- **Once opened to the correct page, you will see text boxes where text can be added and/or manipulated. Type verbiage as needed into each box.**
- **To change the font size, color, orientation, etc. of the text, push CTRL + E on your keyboard to bring up a small dialogue box. All of the text properties can be edited through this. See below:**

- **Once all of the desired information is typed out, insert the media into the printer as the feed arrows indicate.**
- **Finally, select the specific PDF page that correlates to the media on the printer popup window. Please ensure under Page Sizing & Handling that Actual Size is selected – this is very important for proper alignment.**
